

APPLY RIG & MODULES

Exclusively distributed by EES

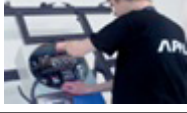

From the top drive to the thrusters, Apply Rig & Modules provides drilling rigs with all the system solutions and services required for efficient, reliable and safe operations.

Apply Rig & Modules is one of Norway's largest and most competent technology companies in electrical, automated and mechanical system packages. This makes them a leading contractor and supplier of products, projects and services to drilling rigs, vessels and oil service companies.

Their business is about being a reliable partner for their customers, and working with customers to find the optimal solutions for their needs and requirements. As a provider of complete solutions, they are the only partner customers need all the way from engineering to fabrication, installation, commissioning, service and maintenance.

Their ambition is to provide their customers with cutting-edge solutions and execution know-how, and to grow as a result of successful projects and customer satisfaction. To achieve this, they practise a hands-on philosophy, focusing on a proactive approach, proximity to the customer, maintaining regularity and providing effective and valuable solutions. Their references prove that they have the experience, competence and resources to execute complex multidiscipline systems and projects.

They are nonetheless determined to continuously improve their performance, based on a comprehensive HSE and quality policy, which makes HSE, customer satisfaction and advanced technology solutions the top priorities in all their activities. Combined with dedicated and active owners, this makes Apply Rig & Modules a partner to be trusted.

	Drilling Control Systems		Multidisciplinary Rig Modifications & Yard Stays
	Bulk & Mud Mix Systems Fluid Management		Modules & LQ Extensions & Upgrades
	Solid Control & Cutting Handling Re-Injection (One OP)		Control Panels & Power Distribution Ex & NON Ex
	Cementing Units		Container Solutions & Equipment
	Choke & Kill		Heat Trace & Winterization
	Swarf Unit		Ex Survey, Inspection & Re-Certification
	General Safety & Automation Systems ESD, PSD, & F&G		Engineering & Project Management
	EIT Installations & Modification		Global Installation & Commissioning
	HVAC & Refrigeration		After Sales & Services, 24/7 Support
